

Superior Fresh

Earth Day Activity | Coloring & Scavenger Hunt

Work together as a family to learn about these common midwest invasive species, than go outside and identify them in real life!

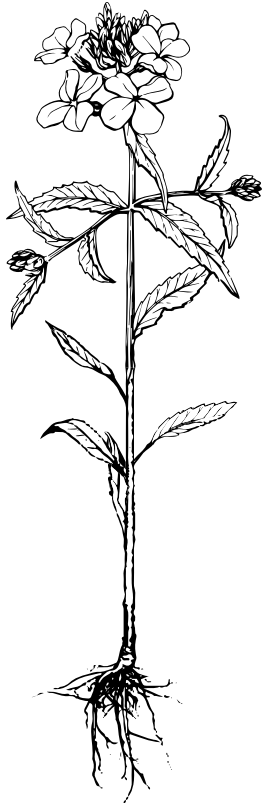

Dame's Rocket *Hesperis matronalis*

4-petaled flower
bloom white, pink, or
purple in late spring

Lance-shaped fine
toothed leaves

Fine hair will be
present on leaves
and stem

Mature plants range
from 1.5 - 3' tall

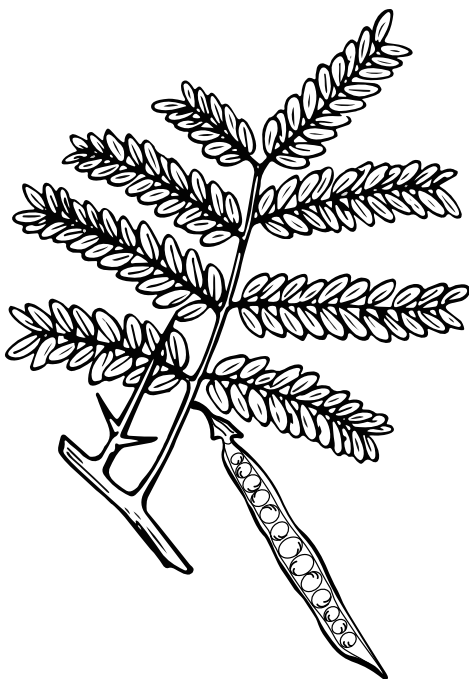

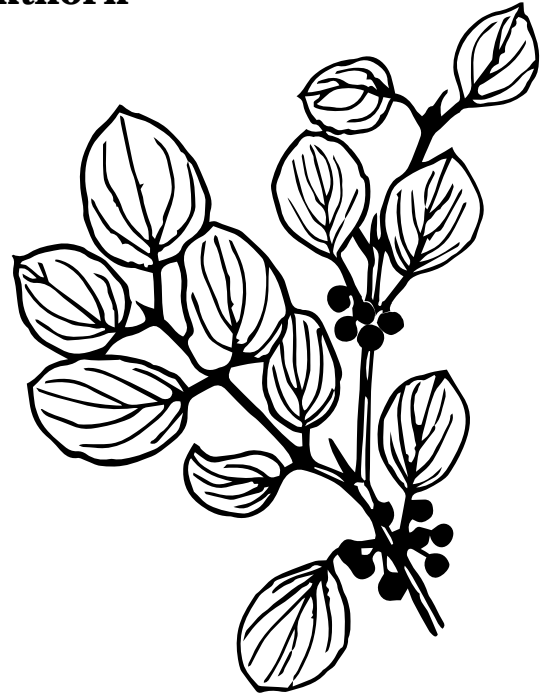

Common Buckthorn *Rhamnus cathartica*

Shrub or small tree
that is 20 - 25' tall
at maturity

4 petaled yellow
flowers that bloom
in spring, ripen to
black berries in
late summer

Oval shaped
leaves with tiny
teeth, foliage stay
green into fall

Black Locust *Robinia pseudoacacia*

Tree that can grow
40-100' tall

Twigs grow 1/2
inch, paired thorns

Oval leaflets on
each side of stalk,
7 -21 per stalk

Droping white
flowers that bloom
in May and mature
to seed pods in
September

Garlic Mustard *Alliaria petiolata*

Up to 3' tall by
early May

Small clusters of
tiny white flowers
with four petals

Varies between
kidney and heart
shaped leaves

Smells similar to
onion or garlic

Superior Fresh

TO CHANGE THE WORLD,
WE CHANGED HOW WE GROW FOOD.

MEET AQUAPONICS:

The combination of aquaculture (raising fish) & hydroponics (the soil-less growing of plants) in a way that benefits all, plants, fish and people.

Local
Salmon

Organic
Greens

Our farm turns 1 ton of fish-feed into just under 11 tons of nutrient dense food. Food that would normally grow on 375 acres or more we can grow on 17!

But **our facility sits on over 800 acres**, so what are we doing with the rest?

Giving back to our planet.
